**synergy**  
On-Site  
FULLY AUTOMATED ON-SITE REFUELING

Fuel Delivered. Anywhere.

## About Synergy Teletech

**Synergy Teletech Pvt Ltd** has evolved mainly to cater fully automated On-Site refueling in stationary equipments. As India's only organized fully automated On-Site Refueller, we are committed to providing great customer service and accountability of every drop of fuel supplied to you.

## About Fully Automated On-Site Refueling

**Synergy On-Site** is the Fully Automated refueling service that comes to your location and delivers fuel directly into your equipment - when and where you need it. It eliminates the need for you to store bulk fuel on site and all the problems with self-fueling your own vehicles and machinery.

**Synergy On-Site** has a fleet of specially designed vehicles that can maneuver into difficult places on site to deliver small amounts of fuel to you as economically as possible, for filling all types of stationary equipments, eg Gensets, mobile plant, factories etc. The best part is that we provide automated reports on real time basis, so that you get billed only to the quantity of fuel supplied to you.

## Why Synergy On-Site?

### The Concern:

Conventionally, the vendors/technicians, purchase fuel from Retail Outlets, carry it in barrels and take it to the concerned location.

- ❖ As diesel is carried in barrel, it is highly unsafe, as chances of spills and ignition are very high.
- ❖ Also there is a big threat of theft all along the way.
- ❖ Tie ups between the vendor /staff and RO is very likely to happen. Practically, there is no way to check over billing.
- ❖ No way to check the Quality and Quantity (Q & Q) of the product.
- ❖ Difficult to ascertain the amount of diesel consumed per DG.
- ❖ Some vendors also store HSD on site to minimize their travel cost.
- ❖ Vendors take long time for reconciliation of their bills.
- ❖ Misplaced/ Lost fuel receipts leads to confusion in reconciliation.

There are many businesses that choose to use **Synergy On-Site**. Typically, these businesses are concerned about safety and environment issues, difficulties in carrying fuel, fuel contamination, theft and vandalism, administration and efficient utilization of staff. Also, with **Synergy On-Site** we assure you a quick and hassle free reconciliation of all your fuel spends.

## BENEFITS

### SAFETY

- ❖ Eliminates the chances of theft/spills/ignition along the way. Fuel leaks, spills or contamination can be extremely costly for any company storing fuel at your work site. You no longer have responsibility for this when you use **Synergy On-Site**.
- ❖ It is safer for your people as they do not need to have direct contact with fuel, which means your environment liability is reduced. Waste associated with leakage and contamination is eliminated.

### CONVENIENCE

- ❖ It is inconvenient and unproductive to move equipment to bulk fuel storage or send staff to pick up fuel. These activities all add to the total expense of your business. **Synergy On-Site** delivers fuel on your location whenever you need it.

### ASSURANCE

- ❖ We dispense fuel through an electronic mobile dispenser, which is governed by our customized application, so you get billed only to the amount of fuel dispensed.
- ❖ Eliminates the malpractice and tie ups between vendors/staff and Retail Outlets.
- ❖ Assurance of Q & Q of the product (as dispensed by the fuel station). Dispensing fuel only at authorized locations (verified by GPS)

### IMPROVE CONTROL AND ADMINISTRATION

- ❖ Relying on drivers and vendors to provide fuel consumption can be challenging. It is not unusual for fuel receipts to be lost, making it difficult for your administration staff. It can become very costly trying to track down or verify receipts. With **Synergy On-Site** you get online reports and can download statements at ease.
- ❖ It is also possible to identify your DG fuel tank via RFID so that it is ensured that fuel has been delivered inside it.

### RECONCILIATION

- ❖ Each **Synergy On-Site** Refueling Van carries our customized application to keep accurate record of fuel delivered. At each job site, our Duty Manager swipes a unique location specific Card and the application then automatically keeps track of the fuel delivered. You can receive daily statements on the amount of fuel dispensed on the previous day, including all the other detailing, such as DG Meter reading, PIU meter reading, EB meter reading etc. You can keep all records on your computer for compliance. You can also get alerts on real time basis.
- ❖ You can calculate per Genset consumption.

### PROMPT DELIVERY

- ❖ We understand the costs associated with downtime of equipment waiting to be refueled. We promise to deliver fuel to your site promptly to minimize downtime.
